DESIGN A

Compact register

One line per certificate. Name and NWMTACI no. share a cell; paid and evaluation shrink to two tick columns; actions sit on one line.

Course shown as code; full name on hover. NWMTACI no. shown as last 4 digits; full number on hover and in search.

- **Row height** about a third of the current one; 12–14 certificates fit on screen.
- **Best for** a Releasing Officer working down a long list every day.

DESIGN B

Two-line rows

No table header. Each row reads left to right: who, what, number, then status and action. A coloured edge marks the state.

- **Full names** of trainees and courses stay readable; nothing is cut to a code.
- **Secondary actions** (void, email soft copy) move into a "More" menu so only one or two buttons show.
- **Works well on a phone:** each row stacks naturally.

DESIGN C

Formal certificate log

A ruled logbook like the printed registers: numbered lines, navy header, every cell one line, one split action button.

Prints column shows used / allowed (1 + approved reprints). " ▾ " opens Void request and Email soft copy.

- **Looks like** an official register, consistent with the printed TAR and vouchers.
- **Prints column** makes the "print once, reprint only when approved" rule visible at a glance.
