NEW WAVE STAFF PORTAL · ASSIGN COURSE

Schedule picker — three designs

Three ways to choose a batch when Registration assigns a course (the window in your screenshot). All three use the Bridge Compass portal style, show seats left, closing time, and room and instructor once the Scheduler fills them in, and keep the "No batch yet — place later" option. The oversized circles from the screenshot are already fixed in the live portal.

#	DESIGN	CHARACTER
01	**Batch cards**	Selectable cards with a date tile and seat meter
02	**Month calendar**	Pick the start day on an October calendar
03	**Compact table**	Sortable rows with room, instructor and seats

SCHEDULE PICKER · DESIGN 01

Batch cards

Selectable cards with a date tile and seat meter. Each batch is a card: a calendar-style date tile, the day pattern and dates, batch number, room and instructor, and a seat meter that turns orange when almost full. The selected card is highlighted, and the footer repeats the choice before you confirm.

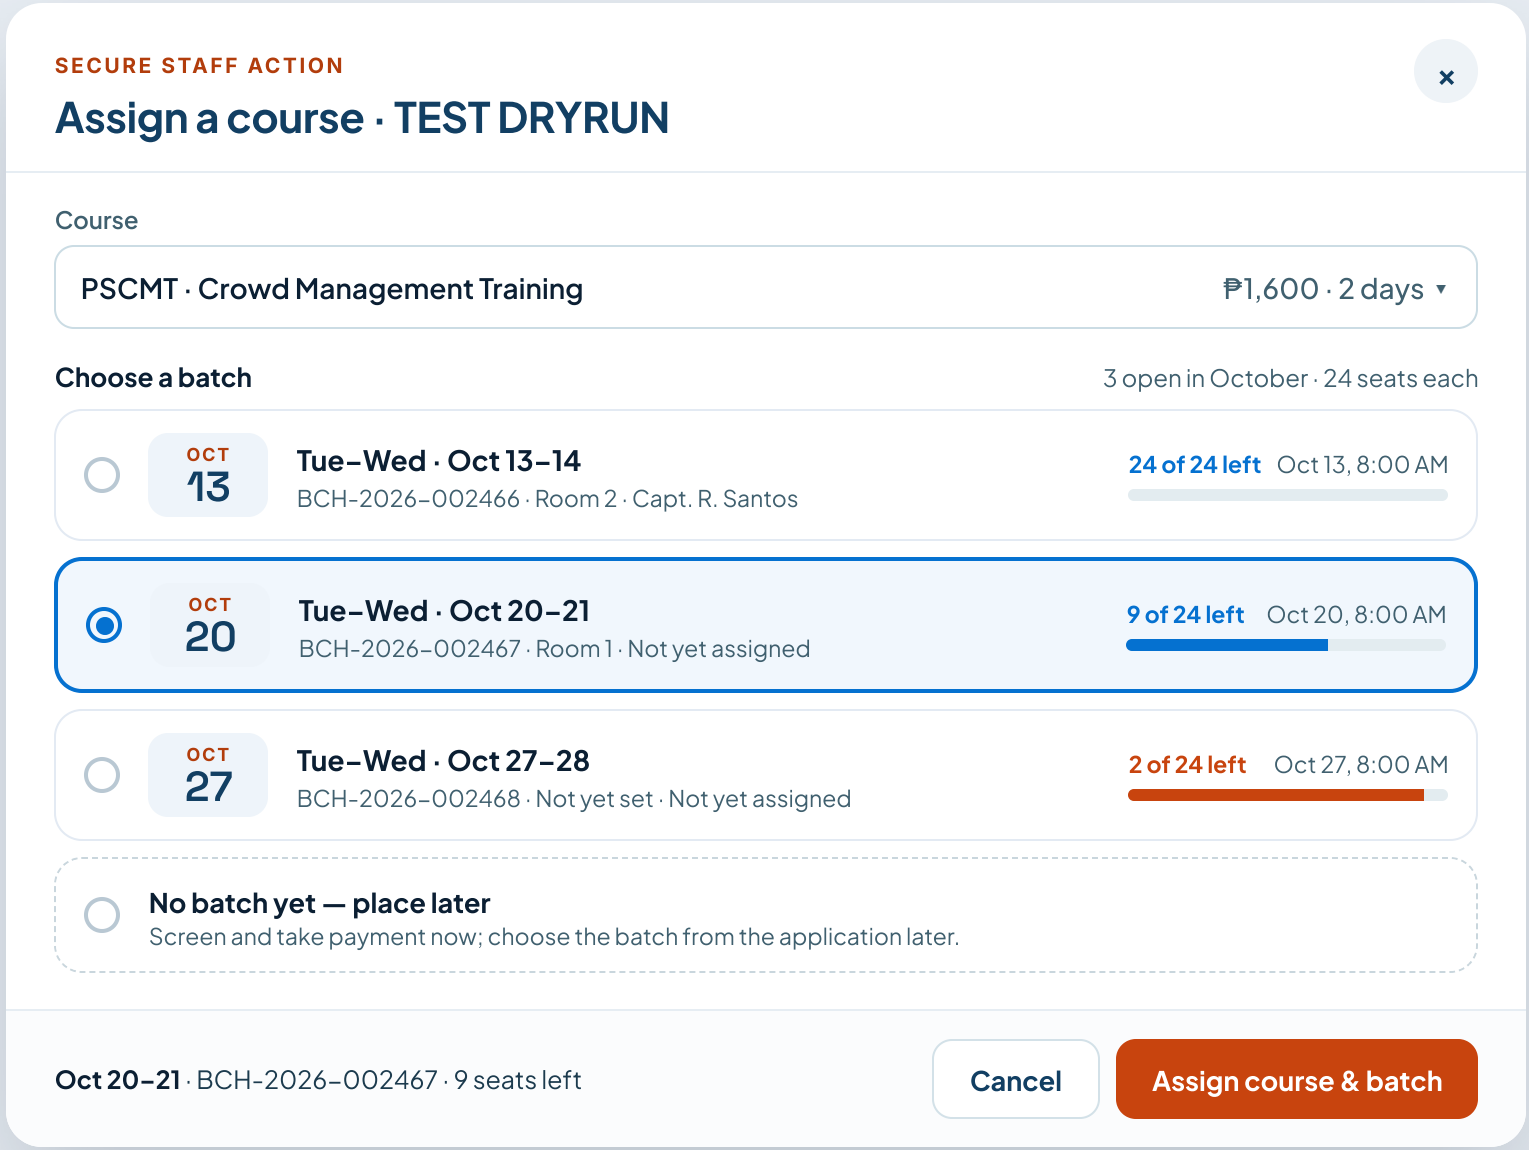

BEST FOR

- Few batches per course (Safety, Crowd, Crisis)
- Seeing seats left at a glance
- Touch screens and tablets

ALWAYS INCLUDED

- Batch dates and day pattern
- Seats left of 24, closing time
- Room and instructor once the Scheduler sets them
- "No batch yet — place later"

Shown with the real October batches for Crowd Management (PSCMT). Room and instructor names are samples.

SCHEDULE PICKER · DESIGN 02

Month calendar

Pick the start day on an October calendar. A month grid with every open batch's days shaded; the start day shows seats left. Click a start day and the side panel shows the batch details. Best when staff think in dates, and it scales to BT-PSSR's 21 daily batches without a long list.

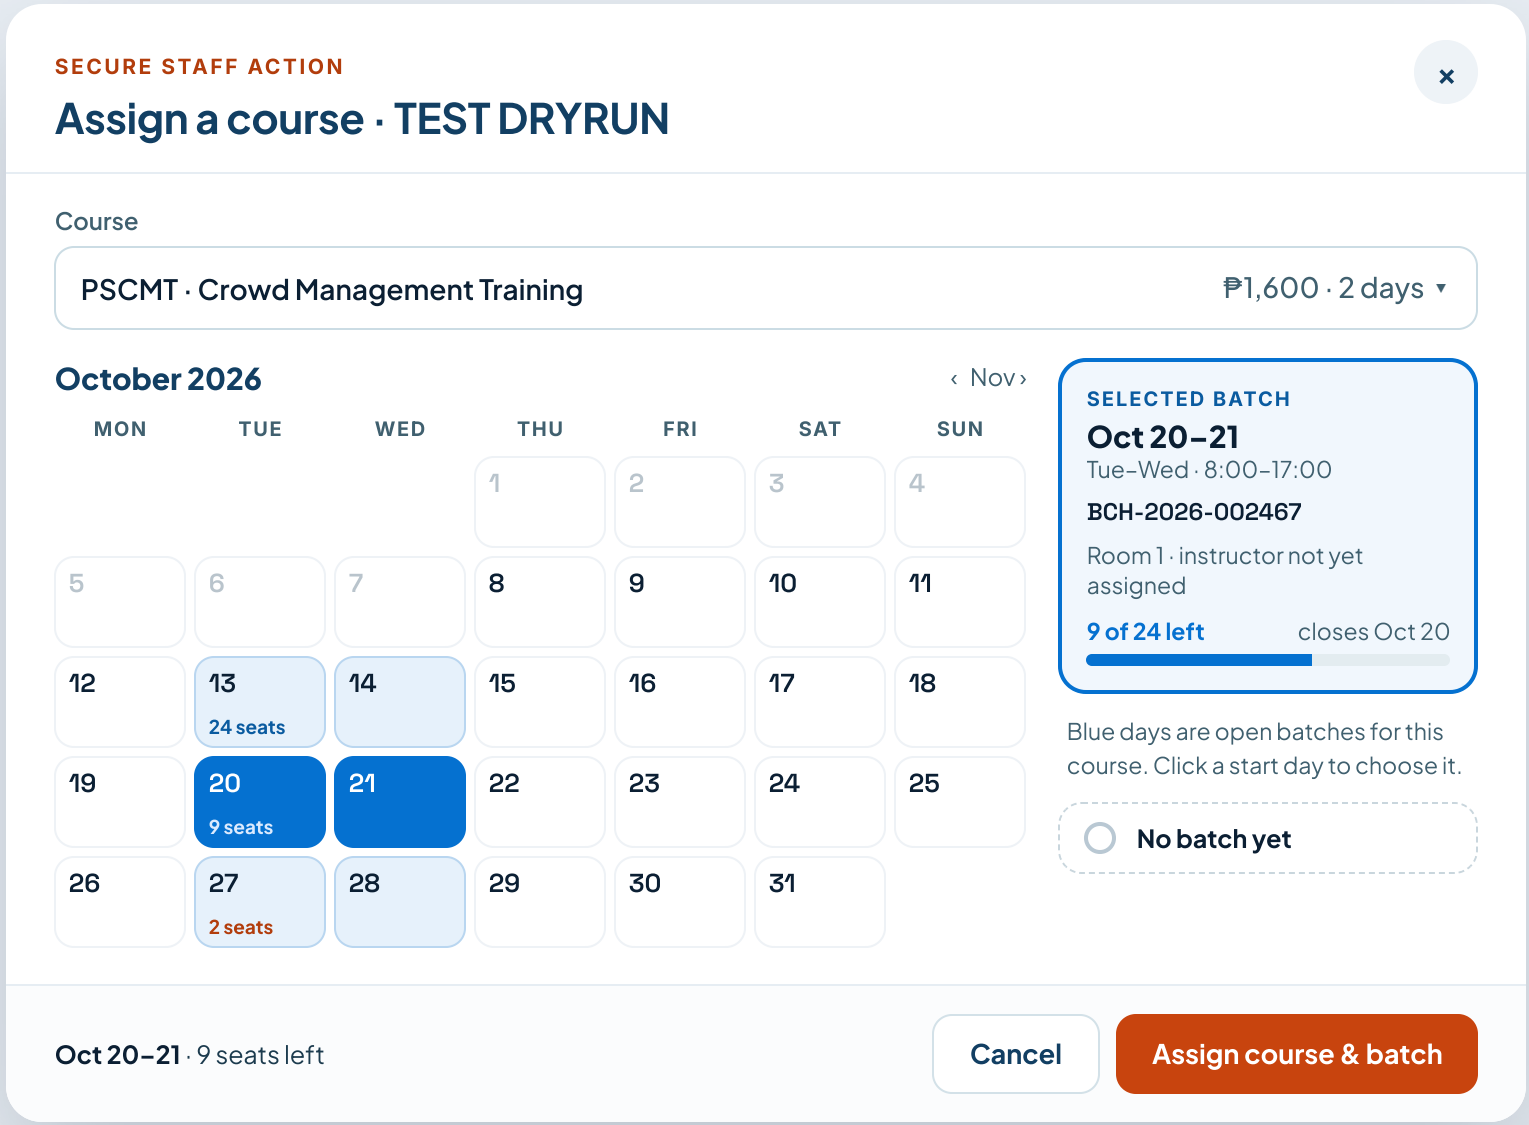

BEST FOR

- Courses with many batches (BT-PSSR daily)
- Applicants who ask for a specific date
- Seeing the month at once

ALWAYS INCLUDED

- Batch dates and day pattern
- Seats left of 24, closing time
- Room and instructor once the Scheduler sets them
- "No batch yet — place later"

Shown with the real October batches for Crowd Management (PSCMT). Room and instructor names are samples.

SCHEDULE PICKER · DESIGN 03

Compact table

Sortable rows with room, instructor and seats. A dense table grouped by month tabs: dates and week, batch number, room and instructor, and an inline seat bar with the closing time. Fast to scan and compare, and shows straight away which batches still need a room or instructor.

BEST FOR

- Comparing many batches quickly
- Spotting batches missing a room or instructor
- Desktop use

ALWAYS INCLUDED

- Batch dates and day pattern
- Seats left of 24, closing time
- Room and instructor once the Scheduler sets them
- "No batch yet — place later"

Shown with the real October batches for Crowd Management (PSCMT). Room and instructor names are samples.
